-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 16 July 2007.

### DETAILED ACTION

Applicant's election without traverse of species I of Group I in the reply filed on 10/20/05 is acknowledged. Claims 5, 8, 13 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species and invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/20/05.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4, 9, 10, 12, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gavit et al (US-6889927) in view of Smith et al (US-4709873).

Gavit et al discloses an apparatus having substantially all the claimed features. Note guide member 46 and resilient securing mechanism 74, 75 ("receiving portions"), and 102/104 ("engagement portion") which is coupled to both the hub and the flanges. Since all recited structures are present, all recited functions such as windable in first and second directions are deemed inherent. The engagement portion 104 is on the guide member 46 and the receiving portions 74/75 are on the flanges. That the engagement portion is instead on the flange and the receiving portion on the guide member as shown by Fig. 3 of Smith et al would have been obvious to a person having ordinary skill in the art merely involving a shift in the location of the parts, all functioning in the same manner. Smith et al also shows a different embodiment in Figs. 1-2 in which a spring tab 110 is used for the same purpose. It would have been obvious to a

Art Unit: 3654

person having ordinary skill in the art to alternatively provide the apparatus of Gavit et al with a spring tab as taught by Smith et al to releasably secure the guide member.

Applicant's arguments filed 7/16/07 have been fully considered but they are not persuasive.

At least fig. 3 of Smith et al shows the resilient member in the flanges as claimed as noted in the rejection above.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed; and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
